

OBJECTS OF DESIRE

Update your windows with high-tech blinds

Lutron Blinds at Intelligent Abodes

AUTOMATED BLINDS

We love automated blinds: on a bright, sunny day you can select the pre-set button on the light switch so the blinds descend just to the right level to protect you and your furniture from heat and sun damage.

And if you are away from home - one press of the button on your smart phone and all is well. We particularly love Lutron as they have revolutionised the roller blind market with their precision motorised systems, offering the ultimate in whisper quiet drive operation and blinds which align perfectly for a balanced, beautiful look to a row of windows.
